Examiner: Cumming, William D.
Title: METHOD OF SUPPORTING MULTIPLE SERVICE
LEVELS IN A WIRELESS DATA NETWORK

REQUEST FOR RECONSIDERATION

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

This is responsive to the Office Action mailed on August 2, 2006. Applicant respectfully requests reconsideration of this application.

There is no *prima facie* case of obviousness under 35 U.S.C. §103 because the proposed combination of *Amin* and *Beeson, Jr., et al.* cannot be made. For the same reason that the temporary identifier of the *Skubic, et al.* reference could not be combined with the *Amin* reference, the temporary user identification code that the Examiner proposes to take from the *Beeson, Jr., et al.* reference cannot be added to the *Amin* reference. The permanent identification storage in the *Amin* reference renders an additional temporary identification essentially useless because it would be redundant to the information that is already permanently stored in the *Amin* reference. Alternatively, if one were to substitute the temporary identification from any reference for that permanently stored in the *Amin* reference, that would be directly contrary to the teachings

of the *Amin* reference. Under either scenario, there is no motivation for making the proposed combination and no *prima facie* case of obviousness.

Applicant believes that this case is in condition for allowance.

Respectfully submitted,

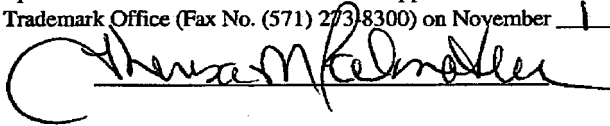

CARLSON, GASKEY & OLDS
